

# Better in Belize

## Safety and Security

**Monthly Report (Inaugural)  
October 13, 2020**

# Committee Mission Tenets

## **Enhanced Safety & Security**

Physical projects and programs that increase safety and security for the community.

## **Research & Information**

Our efforts to research and grow our knowledge base in order to attain any and all safety and security needs and goals.

## **Organization, Protocols and BMPs**

Non-physical projects and programs that increase safety and security for the community as well as Best Management Practices for residents & lot owners.

## **Dissemination**

Providing information to the residents and lot owners of our progress and notice of implementation of projects and programs to ensure transparency and preparedness.

# Completed Projects to Date

## Security Enhancement

Lockbox research, purchase, notification and installation along with keyed lock installation. Having a keyed lock provides less time at the gate for residents and can also be done without delay or issue in the rain and does not require glasses to see small or weathered numbers.

## Organization

Purchase of back board and reorganization of medical and safety supplies in the garden shed.

## Security Enhancement

Addition of bar on gate and painting.

# Spotlight

## WE WANT TO ACKNOWLEDGE MARCIA'S SIGNIFICANT CONTRIBUTIONS TO THIS COMMITTEE!!

After moving to BIB, she volunteered for the Safety and Security Committee and has spent numerous hours shoring up and bolstering the medical supplies by checking the AED and automatic BP cuff, replacing a leaking spray bottle of Dettrol antiseptic, purchasing another bottle of Dettrol, and restocking the first aid kit.

In addition to her time spent assisting on medical, she also bought the keypad lock for the garden shed, replaced the batteries (1 month ago), bought a backup package of new batteries for the lock, purchased and installed a key lock as part of our enhanced security with the lockbox, maintained the lock and lockbox with silicone spray to keep it working smoothly, took on the task of notifying the community of the upgrade so everyone was prepared and ensured all residents had two keys.

She also sanded, primed and painted the gate + the added bar a very visible color in order to prevent accidental run-ins.

THANK YOU, MARCIA for all your volunteer time and work!!
